Product highlights

192kHz/24 bit audio DAC

192KHz sampling enables you to have an accurate representation of the original sound curves. Together with a 24-bit resolution, more information is captured from the original analogue sound wave form, giving a much richer audio reproduction.

DivX Ultra certified

DivX Ultra combines DivX playback with great features like integrated subtitles, multiple audio languages, multiple tracks and menus into one convenient file format.

HDMI for simple AV connection

HDMI stands for High Definition Multimedia Interface. It is a direct digital connection that can carry digital HD video as well as digital multichannel audio. By eliminating the conversion to analog signals it delivers perfect picture and sound quality, completely free from noise. HDMI is fully backward-compatible with (Digital Video Interface) DVI.

High definition JPEG playback

With High Resolution JPEG playback, you can show up to 2 Megapixel resolution on your Flat TV (FTV). Now you can view your digital pictures in their true resolution, without loss of quality or details.

Multi-media formats

Multi-format playability allows you to play most file formats for maximum listening and viewing pleasure, including MP3, WMA, JPEG and the popular DivX digital media format. DivX playback enables you to play and share compressed high quality DivX video content beyond your computer.

Progressive Scan

Progressive Scan doubles the vertical resolution of the image resulting in a noticeably sharper picture. Instead of sending a field comprising the odd lines to the screen first, followed by the field with the even lines, both fields are written at one time. A full image is created instantaneously, using the maximum resolution. At such a speed, your eye perceives a sharper picture with no line structure.

True high-def HDMI 1080p

The highest available high-definition signal format, with 1080 vertical pixels and 1920 horizontal pixels, this feature uses progressive scanning. Experience true high definition resolution pictures on your 1080p-compatible TV.

USB Direct

Simply plug your device into the USB port on your Philips DVD system. Your digital music and photos will be played directly from the device. Now you can share your favorite moments with family and friends.
